

National Weather Service in Gaylord, Michigan Seeks Students for Summer Volunteer Internship

Description: The National Weather Service in Gaylord, Michigan seeks motivated students that desire to learn more about the operations in a local weather service office. In this internship, students will learn many aspects of the day-to-day operations of the office, including warning operations and forecast creation. In addition, students will have the opportunity to participate in office research and outreach. This will give students the opportunity to determine whether a career with the National Weather Service may be right for them.

Length of Internship: Averages two days per week (~10-20 hours) starting in the middle/end of May and continuing through early August. This is an *unpaid* internship.

Eligibility: At least a half-time student pursuing a major in meteorology or atmospheric science that has (by this summer) completed their sophomore or junior year.

What we need from you: A cover letter stating your interest in the internship and why we should select you. In addition, please send your resume that includes the coursework you have completed, any related experience and at least one reference from your current meteorology department.

Deadline: Friday March 15th, 2013

How you will be chosen: Applicants will be selected based on a combination of coursework, references, resume, cover letter and a potential phone interview.

Please send your information to: justin.arnott@noaa.gov or
